We're here to keep you up and running.....

PROFILE

Established in 2016, **MZNPOWER ENTERPRISE** is a trading and services company that provides integrated systems solutions for the supply, installation, and maintenance of power generators.

Since our foundation, our company has made it our mission to provide quality and state-of-the-art generator sets, and contribute to the development of our communities as a power supplier providing a lifeline for the support of our customer's lives and industries.

We're here to keep you up and running, no matter what. Ensuring stable supply of power (24/7).

We're here to keep you up and running.....

MZNPPOWER WILL

We will strive to be a radiant company progressing towards the future with a vigorous and challenging spirit, together with creative ideas and flexible thinking.

We will act

Promptly

Professionally

Keeping in mind our customer's needs

What MZNPpower values

Delivering

Supporting

We're here to keep you up and running.....

At **MZNPOWER ENTERPRISE**, it is important for us to provide our customers with quality and state-of-the art generator sets while at the same time valuing the needs of customers and communities.

We believe that it is our mission and responsibility to support industries big or small in their power supply requirements day in and day out.

We're here to keep you up and running.....

Customer Service

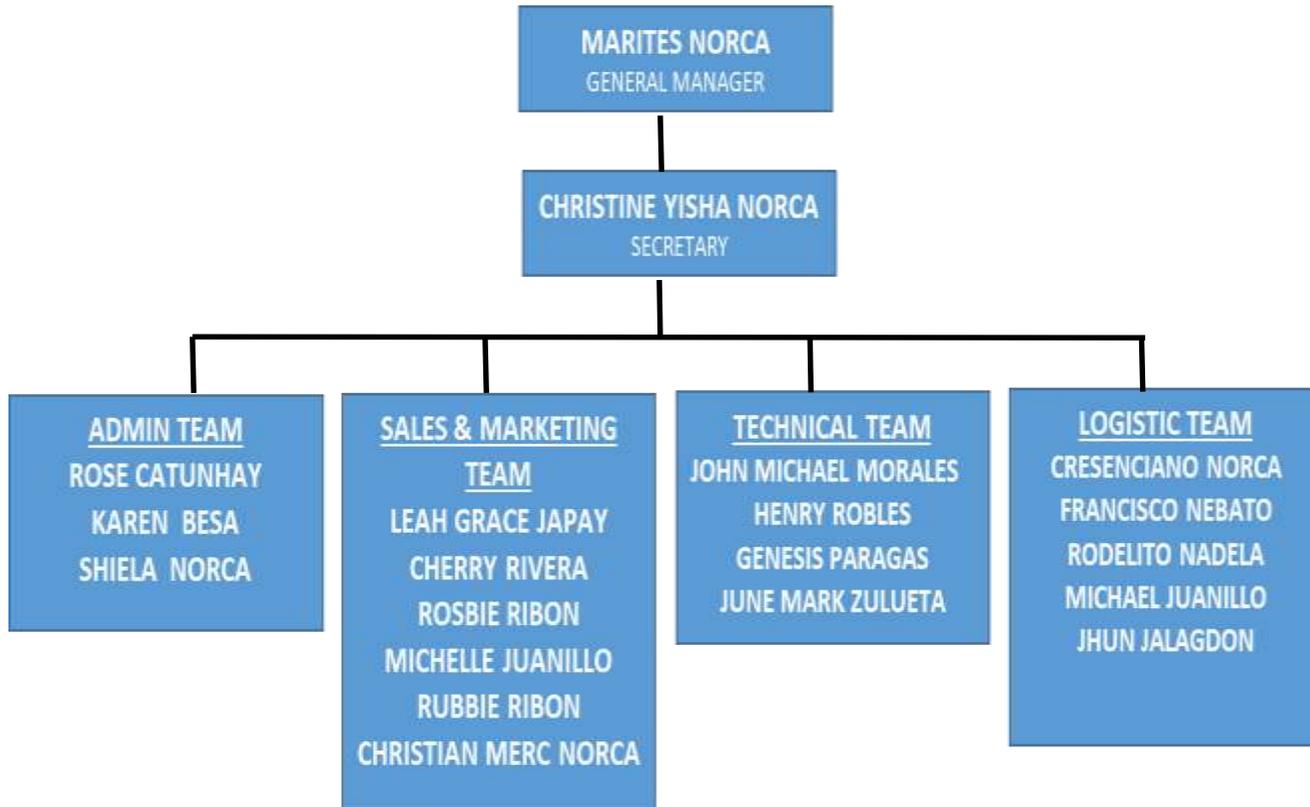

Each employee will hold firmly the conviction that the foundation of our business is the public's trust, sincerely listen to your voices, and respond in good faith.

After Sales Service

Our technical team will assist you in the installation and maintenance of power generator sets.

INDUSTRIES

AIRPORT

BACKUP GENERATORS FOR AIRPORTS

Millions of people depend on air travel for business and pleasure. Airports operate around the clock, and they must have a continuous source of electrical power to keep their various systems and facilities up and running. Even a brief power outage can inconvenience passengers and possibly present a significant safety risk.

INDUSTRIES

AMUSEMENT PARKS

BACKUP GENERATORS FOR AMUSEMENT

The typical amusement or theme park requires a tremendous amount of electricity to power all the rides, attractions, food service operations and lighting. An unexpected power outage could bring everything to a standstill. Besides the inconvenience to the guests who were hoping to enjoy a fun-filled outing, a power loss can also pose a safety risk. Backup generators for amusement parks should be part of every venue operator or owner's contingency plan.

We're here to keep you up and running.....

INDUSTRIES

AGRICULTURE

AGRICULTURE AND POULTRY HOUSES

If you're in the agriculture or poultry house industry, you know that you need a reliable and dependable power source at all times. The quality and well-being of your livestock, poultry and crops depend on having the power to take care of all feeding, cleaning, inspection, harvesting and processing tasks according to schedule. Since the main power source can be at risk of dropping out due to inclement weather, grid overload or aging infrastructure, it's important to have a [backup power source](#) you can count on.

We're here to keep you up and running.....

INDUSTRIES

BANKS AND FINANCIAL INSTITUTIONS

USED GENERATORS FOR BANKS

The consequences of a power failure in a bank or financial institution could be devastating. Besides the inability to complete customer transactions, there's the potential for exposure of sensitive customer data — a data breach could create a significant liability issue that causes permanent damage to the institution's reputation.

INDUSTRIES

CONSTRUCTIONS

USED GENERATORS FOR CONSTRUCTION

A generator can serve many useful purposes at a construction site. It can provide the power for various types of construction equipment and lighting systems, as well as the electricity for the trailer used as a temporary office at the site. A construction generator must be portable so that it can be relocated around the site as needed, and easily transported from one project to another.

We're here to keep you up and running.....

INDUSTRIES

DATA CENTERS

DATA CENTER EQUIPMENT SITES

These days, a data center serves as the “brain” in many organizations. If these large-scale computer systems are unable to perform at a high level, it means that it’s virtually impossible to execute many mission-critical functions. The failure to have a reliable data center power supply could also mean that an entire business operation could come to a standstill in the event of a power outage or other lengthy interruption.

INDUSTRIES

EDUCATION

POWER GENERATORS FOR EDUCATIONAL INSTITUTIONS

Having the power go off can be extremely disruptive for educational institutions. It's important to stick to classroom schedules and avoid unplanned days off, so course material gets covered without distraction. One way to ensure your school, college, university or other educational institution can keep teaching even when the primary power grid fails is to install a [powerful and reliable backup generator](#).

We're here to keep you up and running.....

INDUSTRIES

FACILITIES AND BUSINESS

GENERATORS FOR FACILITY OWNERS

As a facility owner, one of your tasks is to ensure there is ample power in your facility for all of the machines, equipment, and electrical installations. While the reliability of your power generation system is key, so is having an affordable and economical generator to help reduce operating and energy costs. If you have a new facility that requires a [commercial backup generator](#) or are looking to upgrade your current system, our team here at Woodstock Power has the solutions you're looking for.

We're here to keep you up and running.....

INDUSTRIES

GROW ROOMS

GENERATORS FOR GROW ROOMS

A reliable and efficient generator is an important part of any grow room. You need a power supply you can count on for your lights, fans, pumps and other grow room-related electric equipment and installations. If you're building a new grow room or upgrading a current room that doesn't have sufficient power, our team here at Woodstock Power can help you find the right generators at the best prices.

We're here to keep you up and running.....

INDUSTRIES

HOSPITALITY

HOTEL AND RESTAURANT GENERATORS

Ensuring the comfort and satisfaction of your customers is critical in building a positive reputation for your hotel or restaurant. One way to guarantee that you can always supply the service and power your business demands is to plan for emergency backup power.

At MZNPow, we carry many different makes, models and sizes of diesel generators for hotels, restaurants and other commercial buildings. We can help you choose the right size and power for your generator as well as the switches and relays necessary for automatic switching to your backup power source.

We're here to keep you up and running.....

INDUSTRIES

HOSPITAL AND HEALTHCARE

USED HOSPITAL GENERATORS

How confident are you that your generators will be able to provide the necessary power to keep your hospital running in the event of an emergency? If it has been a while since you've replaced your generators, it could be time for an upgrade. Look no further than Woodstock Power for used diesel and natural gas generators for hospitals that provide an unbeatable combination of reliable performance and budget-friendly prices.

We're here to keep you up and running.....

INDUSTRIES

MINING

DIESEL GENERATORS FOR THE MINING INDUSTRY

Diesel generators are a necessity when it comes to the mining industry. Often times, mining sites & operations are in remote locations, so diesel generators are the backbone for power generation. Diesel generators are the preferred generator choice in the mining industry due to their fuel supply, because diesel fuel is less volatile when compared to its natural gas counterpart. The power generated by diesel generators accounts for about 70% of a mining operation's operating power, which is used to power shovels, drills, and excavators for mining coal, copper ore, iron ore, gas, and even precious metals.

We're here to keep you up and running.....

INDUSTRIES

OIL AND GAS

EQUIPMENT FOR POWER GENERATION IN THE OIL & GAS INDUSTRY

Generators play a critical role in oil and gas industry applications such as drilling and digging. They also serve as a backup power source in the event of an interruption to the main power supply that could bring an entire operation to a halt.

INDUSTRIES

PROPERTY MANAGEMENT

POWER GENERATION SOLUTIONS FOR PROPERTY MANAGEMENT

One important aspect of property management is ensuring your customers and tenants always have the power they need. It doesn't matter if you manage a commercial, residential, industrial, educational, medical services or other type of property. Keeping the power on ensures added convenience, satisfaction, productivity and safety for your clients and the general public.

We're here to keep you up and running.....

INDUSTRIES

BEACH RESORTS

BEACH RESORT BACKUP POWER GENERATORS

Beach resorts must have reliable backup power generators to minimize the risk of a lengthy power failure.

We're here to keep you up and running.....

INDUSTRIES

TELECOM

USED TELECOM POWER SYSTEMS

When it comes to repairing cell towers or other important infrastructure, every second it takes to get back up and running is critical. For this reason and others, the telecom industry demands reliable, cost-effective backup power

DIESEL GENERATOR

POWERED BY PERKINS

Perkins engine(U.K) was formed as F.Perkins Ltd. on the 7th June 1932 in Peterborough, England by Frank Perkins. It is one of the world's leading diesel engine manufactures, from 1932, Perkins design the world's first high-speed diesel engine "Perkins four cylinder Vixen", and in 1935, Perkins became the first company to hold six world diesel speed records for variety of distances set at the brooklands race track in Surrey. Today, various Perkins engine have been made for the industrial, agricultural, construction, material handing, marine and power generation markets. Worldwide, one in five tractors is powered by Perkins engine, Perkins have developed into the top suppliers in the world market with the electric power generation area concluding 4-2000KW(5-2600HP). People from all over the world gave full of trust to Perkins engine, the trust not only comes from Perkins excellent design, reliable products, but also from Perkins global distributors and the service which every agent provides.

We're here to keep you up and running.....

DIESEL GENERATOR POWERED BY ISUZU

Founded in 1916, ISUZU Motors has the longest history of any Japanese vehicle manufacturer. For nearly 70 years, ISUZU has been pioneering numerous technological innovations in the diesel engine field. With a cumulative total production of nearly 19 million diesel engines from its foundation, ISUZU is poised for sharpening its edge as the leading diesel manufacturer.

ISUZU products now benefit people in over 100 countries. To ensure the most advanced safety, economic and environmental performance as well as super service, we are moving forward in product development, quality, manufacturing systems and customer support, which will become the new global standards of excellence. It is an uncompromising commitment to improvement for better products and a better partnership with the world.

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY YANGDONG

Yandong co.,Ltd is one of the largest diesel engine production base in China. with "integrity, pragmatic, innovative" concept to provide high-tech, high-performance, high-quality products and first class service for the purpose, adhere to scientific and technological innovation, to become experts in power integrated solution. The company increased R & D efforts, relying on YTO Group National Technical Center's technical superiority and cooperate with the Southwest Research Institute, Austria AVL, FEV, Germany FEV and Japan YAMAHA, many of the world-renowned agencies, using electronically controlled fuel system EGR system, DPF system, and other international scientific and technological achievements, for a full range of technological transformation, have successfully completed to make diesel product research and development meet Euro III, IV emission standard, and have complete independent intellectual property rights. Company is currently working on product development which can meet Euro V emission standards.

The company has passed ISO9001 international quality system certification and ISO/TS16949 quality system certification, small bore multi-cylinder diesel engine was the national product quality inspection certificates, Yangdong diesel engine received 10 consecutive years, "Jiangsu Famous Brand", "Trustworthy Product of Jiangsu Province" and so on. some products certified by the U.S. EPA, the European Union Emark and CE certification.

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY YUCHAI

Guangxi Yuchai Machinery Co., Ltd. (hereinafter referred to as "Yuchai"), founded in 1951, is the first sino-foreign joint venture in the domestic industry to be listed abroad and is the president unit of China Internal Combustion Engine Industry Association, with the products exported to more than 180 countries and regions in Asia, Europe, America and Africa. Yuchai is headquartered in Yulin, Guangxi Zhuang Autonomous Region, with 11 subsidiaries.

With the mission of "achieving customer value and driving a better life", Yuchai is committed to meeting the public demand for power by excellence and leadership and continuously increasing the value of engine products.

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY WEICHAI

Founded in 1946, Weichai has over 95,000 employees worldwide. With the annual revenue of more than 300 billion RMB in 2020, Weichai ranks the 77th among China's top 500 enterprises, the 23th among China's top 500 manufacturing enterprises, and the 1st among China's machinery industry top 100 enterprises.

Weichai is a multi-field and multi-industry international group which owns powertrain, vehicle, construction machinery, intelligent logistics, agricultural machinery, marine transportation equipment and other business segments. The subsidiaries of Weichai Group spread all over Europe, North America, Asia, and other regions, and its products are exported to more than 110 countries and regions. Weichai Group has 9 stocks from 7 listing companies: Weichai Power (2338.HK; 000338.SZ), Weichai Heavy Machinery (000880.SZ), Asiastar Bus (600213.SH), and KION Group (KGX.F).

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY DEUTZ

DEUTZ is one of the world's leading manufacturers of innovative drive systems. Its core competences are the development, production, distribution and servicing of diesel, gas and electric drivetrains for professional applications. The engine specialist offers a broad product spectrum with capacities ranging up to 620 kW that is used in construction equipment, agricultural machinery, material handling equipment, stationary equipment, commercial vehicles, rail vehicles and other applications.

Originally founded as N.A. Otto & Cie. in Cologne, Germany, in 1864, DEUTZ AG is now the world's oldest engine company and one of the world's leading independent engine manufacturers. DEUTZ offers its customers a comprehensive and short-termed support by 13 distribution companies, 7 sales offices and over 800 sales and service partners in more than 130 countries around the world.

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY LOVOL

Weichai Holding Group Co Ltd, a leading Chinese powertrain manufacturer, has acquired a controlling stake in Lovol in early January 2021. According to a strategic restructuring agreement, Weichai Group took a 60 percent stake in Lovol Heavy Industry Co Ltd while Tianjin Lovol holds 38.62 percent.

The acquisition means the discontinuation of the Lovol Generator Engine business, which we have replaced with market-leading engine brand in SDEC.

We're here to keep you up and running.....

POWERED BY SDEC DIESEL GENERATOR

SDEC

SDEC was founded in 1947 and is a generator manufacturer and supplier. They have supplied generators and diesel engines to customers around the world. They are ISO9001, QS9000 and TS16949 certified, which is testament to their quality and reliable performance.

These generator sets offer long service lives with great fuel economy. The generating sets can be started by simply pouring oil and coolant into the system and flipping a switch.

We're here to keep you up and running.....

DIESEL GENERATOR

POWERED BY YANMAR

Since YANMAR's founding more than 100 years ago, our company has been driven by a pioneering spirit for world-leading technology. Today, this technology continues to be a core focus, allowing us to utilize and transform all kinds of energy resources into power that can be harnessed for highly efficient human convenience.

Using our ever advancing technology, YANMAR continuously strives to exceed customer expectations and deliver exceptional lifetime value by integrating our products, services and knowledge into superior quality, comprehensive solutions.

Food and energy are two needs of increasing importance for which YANMAR is committed to providing optimal solutions to our customers. We gather knowledge and insights from a variety of resources, research institutes and corporations to develop innovations aimed at creating a global sustainable society. Sustainable prosperity for all and, A Sustainable natural environment. YANMAR will pursue these two "sustainables" to the next level, towards a new era of prosperity in the coming century.

DIESEL GENERATOR

POWERED BY FAW

FAW generator engines (FAWDE Generators) are a highly technological and reliable brand, growing quickly in popularity as a brand of choice in generators. Used extensively throughout the world in the FAW range of heavy trucks and commercial vehicles it is now being used to power generators - with very good results. It is the most cost-effective of the

ELECTRICAL PARTS

WE STOCK A WIDE RANGE ELECTRICAL PARTS

We pride ourselves on the quality of our electrical parts for all of our generator and engine brands. We carry electrical parts from market leaders

SmartGen Generator Controllers
SmartGen ATS
Circuit Breaker
Genset Batteries
Speed Controllers
Stop Solenoid

SMARTGEN CONTROLLER

We stock the 420N, 6120 and 7220 range of SmartGen controllers. These controllers are reliable, durable and when configured correctly give your generator effective operation, precise monitoring of operating parameters and a host of protection capabilities.

This series of SmartGen controllers integrate digitalisation, intelligence, and network technology. The controllers can operate in extreme temperature conditions with the help of a vacuum fluorescent display (VFD) or liquid crystal display (LCD), and the components that resist extreme temperature. The generator controllers have a strong resistance to anti-electromagnetic interference and can be used under a complex electromagnetic interference environment. They are easy to maintain and upgrade due to the plug-in terminal.

SmartGen

SMARTGEN ATS

SMARTGEN ATS

A SmartGen ATS is an electrical switch that switches a load between two sources. Some transfer switches are manual, in that operator affects the transfer by throwing a switch, while others are automatic and trigger when they sense one of the sources has lost or gained power.

The generator ATS (Automatic Transfer Switch) is often installed where a backup generator is located, so that the generator may provide temporary electrical power if the utility source fails.

<https://www.genking.co.za/diesel-generator-parts/electrical-parts/smartgen-ats/>

SmartGen

GENERATOR AVR

RELIABLE GENERATOR AVR

The Generator AVR (Automatic Voltage Regulator) is at the heart of devices called power stabilisers. These units will often be combined with one or more other power quality components like a surge protector that will stop the power surge from damaging the electronic components of the unit. It can also be combined with a short circuit protection or circuit breaker to switch the power off should there be dangerous fluctuations. They will help with phase to phase voltage balancing which prevents unwanted phase imbalance which can damage the generator or alternator.

*SX460

*SX 440

CIRCUIT RELAYS

RELIABLE CIRCUIT RELAYS

Generator Circuit Relays are electrically operated switches. It consists of a set of input terminals for a single or multiple control signals, and a set of operating contact terminals. The switch may have any number of contacts in multiple contact forms, such as making contacts, break contacts or combinations thereof.

The advantage of relays is that it takes a relatively small amount of power to operate the relay coil, but the relay itself can be used to control motors, heaters, lamps or AC circuits which themselves can draw a lot more electrical power.

12V, 24V, 12V-10A, 12V-40A, 24-40A

BATTERY CHARGER

SmartGen Battery Chargers provide a relatively small amount of current, only enough to counteract the self-discharge of a battery that is idle for a long time. If your generator struggles to crank, you may need to replace the batteries and the charger.

BAC06 series switching battery charger adopts the latest switch power components, which is designed for charging lead-acid starting battery according to its property.

The charger is suitable for lead-acid battery float charge. The maximum charge current for 12V charger is 6A; the maximum charge current for 24V charger is 3A.

12V, 24V

STOP SOLENOID

RELIABLE STOP SOLENOID

A Stop Solenoid is used to cut the fuel supply to the engine when the ignition is switched off or when a stop signal is given by a generator controller. It fits into or is fitted externally to the diesel distribution pump. When the solenoid is turned on the plunger pulls the valve which allows fuel to pass through. If your generator keeps on running even though the stop button is pushed you may need a new one.

12V, 24V

PRIMING ELECTRONIC FUEL PUMP

PRIMING ELECTRONIC FUEL PUMPS

If the generator has been idle for a period of time, the Priming Electronic fuel pumps may lose pressure to the injectors. The result is that the fuel in the pipe from the base tank to the injection pump is empty and the generator will struggle to start. A good solution is to install a priming pump to raise the pressure back to optimal to start and run the engine. The pump also has a built-in non-return valve.

Priming Electronic fuel pump 12 Volt
Priming Electronic fuel pump 24 Volt

We're here to keep you up and running.....

PRIMING ELECTRONIC FUEL PUMP

SMARTGEN BLOCK WATER HEATER

SmartGen Block Water Heater uses an engine block heater to warm the engine to maximise the chances that the engine will start as well as warm up the generator faster than it normally would in extremely cold weather. This allows generator sets to take up load quickly in an emergency.

The heater element is connected to the engine's cooling system in line with one of the radiators or heater hoses. This keeps most of the engine warm. For certain engine options, we offer an element that connects directly into the block to heat up the engine oil.

HT22M 2200W

HT40M 4000W

SmartGen

CIRCUIT BREAKERS

RELIABLE CIRCUIT BREAKERS

A circuit breaker is an automatically-operated electrical switch designed to protect an electrical circuit from damage caused by excess current from an overload or short circuit. Its basic function is to interrupt current flow after a fault is detected. It is also used to isolate electrical current on generators when running on manual mode. We stock a wide variety of circuit breakers from 5 to 1200A.

We're here to keep you up and running.....

GENERATOR BATTERIES

RELIABLE GENERATOR BATTERIES

Not all Generator Batteries are made equal and a car battery won't last for very long inside a generator set. There are different voltages, sizes, and ratings that we apply to every different size of generator we produce. Every type serves a specific functionality. We stock batteries that are correctly specified to serve your specific generator. Contact one of our professional sales staff to spec the correct battery for your application.

12V
24V

SPEED CONTROLLERS

RELIABLE SPEED CONTROLLERS

The speed controllers are used in conjunction with electronically-governed generator diesel engines to control the fuel injection system.

FAW 13-66kVA C2002

Cummins 46-265kVA S6700E

YTO 150-400kVA FSK639D

EMERGENCY STOP BUTTONS

RELIABLE EMERGENCY STOP BUTTONS

An emergency stop push button is a control switch that provides both safety for the machinery and for the person using the machinery. The purpose of the emergency push button is to stop the machinery quickly when there is a risk of injury or the workflow requires stopping.

IGNITION SWITCHES

RELIABLE IGNITIONS SWITCHES

An ignition switch, starter switch or start switch is a switch in the control system of a generator that activates the main electrical systems for the genset.

IGNITION SWITCHES

RELIABLE IGNITIONS SWITCHES

An ignition switch, starter switch or start switch is a switch in the control system of a generator that activates the main electrical systems for the genset.

MECHANICAL PARTS

We pride ourselves on the quality of our mechanical components for all of our generator and engine brands. We supplies an extensive variety of OEM original mechanical components including;

Starter Motors

Fuel injection pumps

Speed Sensors

DC Alternators

Thermostats

STARTER MOTOR

We supply starter motors on the following brands of engines: Faw, Lovol, Cummins, Volvo Penta, YTO, Perkins, YANGDONG and ISUZU.

- * Faw (FAWDE) Starter Motor
- * Cummins Starter Motor
- * Volvo Penta Starter Motor
- * YANGDONG Starter Motor
- * ISUZU Starter Motor

FUEL INJECTION PUMPS

We supply generator fuel injection pumps on the following brands of engines: Faw, Lovol, Cummins, Volvo Penta, Yangdong, Perkins, SDEC and Isuzu.

- * Faw (FAWDE) Fuel Injection Pump
- * SDEC Fuel Injection Pump
- * Cummins Fuel Injection Pump
- * Volvo Penta Fuel Injection Pump
- * YANGDONG Fuel Injection Pump
- * ISUZU Fuel Injection Pump

ENGINE INJECTORS

We supply injectors on the following brands of engines: Faw, Lovol, Cummins, Volvo Penta, YANGDONG, Perkins, SDEC and Isuzu.

- * Faw (FAWDE) Fuel Injection Pump
- * SDEC Fuel Injection Pump
- * Cummins Fuel Injection Pump
- * Volvo Penta Fuel Injection Pump
- * YANGDONG Fuel Injection Pump
- * ISUZU Fuel Injection Pump

We're here to keep you up and running.....

ENGINE INJECTORS

WE STOCK A FULL RANGE TURBOCHARGER

We stock turbo's on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * FAW (FAWDE) Turbo
- * SDEC Turbo
- * Cummins Turbo
- * Volvo Penta Turbo
- * YANGDONG Fuel Turbo
- * ISUZU Turbo

SPEED CONTROLLERS

We supply diesel engine speed sensors on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) Speed Sensor
- * SDEC Speed Sensor
- * Cummins Speed Sensor
- * Volvo Penta Speed Sensor
- * YANGDONG Speed Sensor
- * ISUZU Speed Sensor

GASKETS KITS

We supply engine gasket kits on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YTO and Scania.

- * Faw (FAWDE) Engine Gaskets
- * SDEC Engine Gaskets
- * Cummins Engine Gaskets
- * Volvo Penta Engine Gaskets
- * Yangdong Engine Gaskets
- * ISUZU Engine Gaskets

We're here to keep you up and running.....

DC ALTERNATORS

We supply DC alternators on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) DC Alternator
- * SDEC DC Alternator
- * Cummins DC Alternator
- * Volvo Penta DC Alternator
- * YANGDONG DC Alternator
- * ISUZU DC Alternator

We're here to keep you up and running.....

WATER PUMPS

We supply generator water pumps on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) Water Pump
- * SDEC Water Pump
- * Cummins Water Pump
- * Volvo Penta Water Pump
- * YANGDONG Water Pump
- * ISUZU Water Pump

THERMOSTATS

We supply diesel engine thermostats on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) thermostat
- * SDEC thermostat
- * Cummins thermostat
- * Volvo thermostat
- * YANGDONG thermostat
- * ISUZU thermostat

THERMOSTATS

WE STOCK A FULL RANGE OIL PRESSURE SENSOR

We stock diesel engine oil pressure sensors on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) Oil Pressure Sensor
- * SDEC Oil Pressure Sensor
- * Cummins Oil Pressure Sensor
- * Volvo Penta Oil Pressure Sensor
- * YANGDONG Oil Pressure Sensor
- * ISUZU Oil Pressure Sensor

TEMPERATURE SENSORS

We supply diesel engine temperature sensors on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) Temperature Sensor
- * SDEC Temperature Sensor
- * Cummins Temperature Sensor
- * Volvo Penta Temperature Sensor
- * YANGDONG Temperature Sensor
- * ISUZU Temperature Sensor

RADIATORS

WE STOCK A FULL RANGE RADIATORS

We stock diesel engine radiators on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, Yangdong and Isuzu.

- * Faw (FAWDE) Radiator
- * SDEC Radiator
- * Cummins Radiator
- * Volvo Penta Radiator
- * YANGDONG Radiator
- * ISUZU Radiator

FAN BELTS

We supply diesel engine fan belts on the following brands of engines: Faw, SDEC, Cummins, Volvo Penta, YANGDONG and ISUZU.

- * Faw (FAWDE) Fan Belt
- * SDEC Fan Belt
- * Cummins Fan Belt
- * Volvo Penta Fan Belt
- * YANGDONG Fan Belt
- * ISUZU Fan Belt

We're here to keep you up and running.....

TRANSFER SWITCH

AUTOMATIC TRANSFER SWITCH (ATS)

MANUAL TRANSFER SWITCH (MTS)

Why is a manual transfer switch MTS panel important?

A [transfer switch](#) (either manual or [automatic](#)) is required in every country when installing a generator at premises with a mains supply. It is required by law for good reason. A transfer switch avoids:

The mains power coming into contact with the generator, which would almost certainly burn out if this happened.

It stops the generator from back feeding the mains when it's failed, endangering the lives of electricity utility workers.

In terms of importance, both the manual and [automatic switch](#) perform the same [transfer switch](#) function, however the automatic transfer switch ATS panel does the process automatically, saving time and reducing the power outage length.

What are the advantages/disadvantages of a manual transfer panel?

Here is a summary of the advantages and disadvantages of a manual transfer panel over an [automatic transfer switch](#).

Advantages of a manual transfer panel

Cost - the Manual transfer panel is much cheaper than an automatic panel.

Control - the automatic switch will cause the generator to start even if you aren't home - unless you remember to turn off the generator.

Wiring - there are no control cables needed, just the electricity supply cables.

Disadvantages of a manual transfer panel

You need to switch it every time the mains fails and you want to run the generator.

You need to start the generator manually each time.

If you aren't nearby, you cannot start the backup power.

It takes longer - the automatic panel can react as soon as the mains fails.

AUTOMATIC TRANSFER SWITCH

An automatic transfer switch (ATS) is a device that transfers a power supply from its primary source automatically to a backup generator when it senses a failure or outage occurring in the primary source until utility power is restored.

Range
100amps up to 4000amps

Breaker: Fujikedin, Delixi, WT, Square D, GE

MANUAL TRANSFER SWITCH

A manual transfer switch panel, or MTS panel, is a type of [transfer panel](#) used with a diesel generator to switch between the mains and generator in the event of a power failure. Using the manual transfer switch requires you to turn a handle or alternative lever to switch between the mains and the generator and to start the generator manually.

Range
100amps up to 4000amps

Breaker: Fujikedin, Delixi, WT, Square D,
GE
